

KERN AND KERN UNI - DRY SUIT

Introducing our newest top-of-the-line water rescue dry suit, designed to provide unmatched protection and comfort for water-based rescue operations. Crafted from a durable and breathable 4-layer fabric, this dry suit ensures that you stay dry and comfortable in the most demanding conditions.

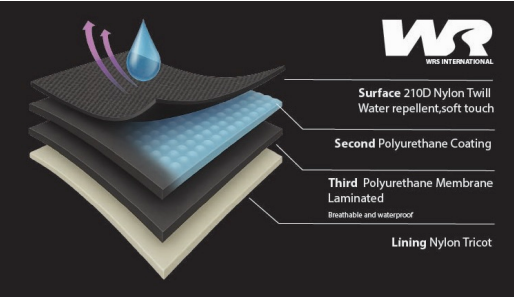

Featuring a large front entry YKK® chest zipper, donning and doffing the suit is quick and easy, making it ideal for swiftwater rescue situations. The double neoprene neck gives unmatched durability and comfort, 4 way stretch neoperene cuffs and Fabric dry socks. While the articulated padded knees and elbows provide flexibility and protection during movements.

Built for durability, the tough HiViz nylon fabric on the seat area enhances the suit’s resistance to wear and tear.

The internal adjustable braces allow for a customized fit, ensuring comfort even during extended wear. Reflective SOLAS tape on the cuffs enhances visibility in low-light conditions.

BRAND NEW UNI SUIT ZIPPER
The KERN UNI suit comes with a standard Fly Zipper or the innovative YKK UNI zipper giving all suit users the option for toilet access when used the the compatible thermal under suit.

Trust our water rescue dry suit to deliver the performance and reliability you need for water rescue operations. Stay protected, stay comfortable, and stay prepared with this essential piece of gear.
