

NSAPTK Air Purity Test Kit

LETO-C1| Breathing air quality test kit

The LETO-C1 is a portable test kit that measures the purity of breathing air from cylinders and compressors quickly, easily, and accurately. Our kit enables you to accurately measure carbon monoxide, carbon dioxide, water vapour and oil levels in breathing air. Preset settings of the flow rate for the gases enables you to use the kit instantly. Tubes are clearly arrow marked for use with the kit giving you quick and easy to understand results.

According IMCA regulations annual testing of your air quality is advised for bail-out sets, escape sets and breathing air compressors. The air quality should be confirm to EN 12021. The kit has a easy to understand quickstart guide that has the approved concentrations for the gasses as specified in EN 12021.

The Air Purity Test Kit contains :

- 1x Case, consisting of pressure reducer, pressure gauge and tube holders
- 1x High pressure regulator (300 bar) with low pressure hose and male quick connector
- 10x Dräger Oil Impactor
- 10x Dräger Carbon Monoxide Tube
- 10x Dräger Carbon Dioxide Tube
- 10x Dräger Water Vapour Tube
- 1x Dräger Tube Breaker
- 1x Timer
- 1x Quickstart Guide

Features:

- 4 Gasses simultaneously
- Quick and easy
- Uses readily available tubes

Applications:

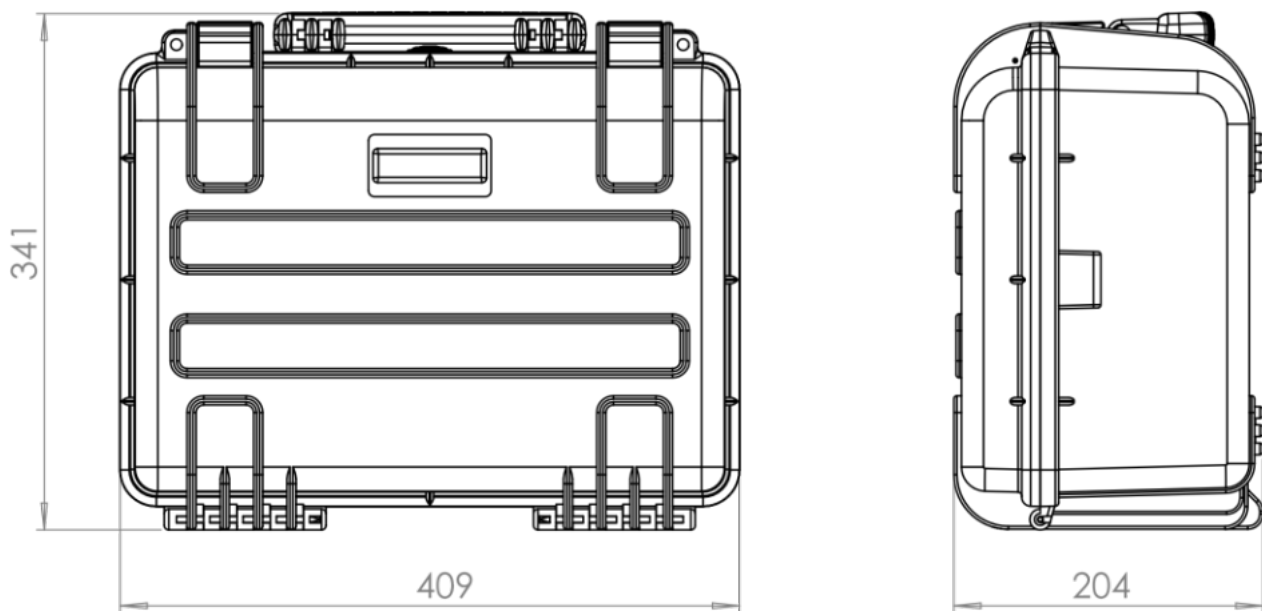

- Commercial Diving
- Personal Air supply

NSAPTK Air Purity Test Kit
Specifications :

Model	NSAPTK
SKU	NSAPTK
Measurement	
CO	Dräger: Aerotest Carbon Monoxide 5/a-P
CO2	Dräger: Aerotest Carbon Dioxide 100/a-P
H2O	Dräger: Aerotest Water Vapor 5/a-P
OIL	Dräger: Aerotest Impactor
Connections	
Panel Inlet	MIGNON D5, max. 16 bar
Reducer Inlet	DIN G5/8, 300 bar
Dimensions	
Height	341 mm
Width	409 mm
Depth	204 mm
Weight	8,2 Kg

Dimensions (mm)

NOVASUB Available products that can be used in combination with LETO :

PROTEUS

DIVING AIR / COMMS / LIGHT & VIDEO PANEL
All-in one rack

BOREAS

DIVING AIR
Cases & Panels

DUx

UMBILICALS
