

## Aquacom® SSB-2001B-2, 2-channel diver transceiver

Model: SSB-2001B-2, Aquacom SSB 2-channel, NO voice menu, diver transceiver, 25/33 kHz  
Can be used w/CDK-6

Based on the extremely popular Aquacom® SSB-2010, the Aquacom® SSB-2001B-2 transceiver is a 5 watt, dual-channel single sideband underwater telephone. Unlike the Aquacom® SSB-2010, the Aquacom® SSB-2001B-2 has no voice menus and only 2 channels. The Aquacom® SSB-2001B-2 can be configured to operate with virtually any style full face mask (FFM) or mouth mask. With the addition of a CDK-6 Surface Accessory Kit, the Aquacom® SSB-2001-B2 is easily converted into a portable surface station.

Standard features are: Voice Operated Transmitter (VOX), Push-to-talk control (PTT), Squelch, 2 channels, Earphone volumes, removable transducer, and heavy duty design.  
This system is tough, powerful, and a must for any serious Search & Rescue Team.
